[iOS App Store Link](#)

MINIMUM PHONE REQUIREMENTS NEEDED

- Each Participant is required to use an Android phone with version 12 or newer OR an iPhone with iOS version 18.x or newer.

UPDATE YOUR CELL PHONE’S OPERATING SYSTEM

- It is CRITICAL to check and make sure that your cell phone’s operating system is UPDATED to the most current version available to ensure proper functionality with the eTournament Fishing app.

eTOURNAMENT FISHING PRACTICE EVENT

- IT IS HIGHLY ENCOURAGED THAT ALL PARTICIPANTS enter the FREE eTournament Fishing “IFA Practice Event” in the app and make some submissions prior to the tournament. Measurement photos and release videos can be of anything, your dog, your shoes, etc. This will confirm the app’s compatibility with your cell phone and allow you to become familiar with the fish submission process in the app.

APP CHECK-IN PRIOR TO THE EVENT

- Participants MUST CHECK-IN to the event prior to the start while you have a good cellular data or Wi-Fi connection. This allows the app to function in online mode when good cellular service is available or in the offline mode when you are in areas with poor or no cellular service. When you have a good cellular data or Wi-Fi connection, open the eTournament Fishing app and go to the event that you registered for and tap the “Check-In” box in the upper right corner. This can be done immediately after registering for the event.

CPRV™ FORMAT

- This is a CPRV™ (Catch, Photo, Release Video™) format event. The CPRV™ format is used to promote conservation and to eliminate the harvest of any fish. AT NO TIME during tournament hours are participants allowed to catch and hold the fish on a stringer, or in a basket, cooler, or livewell, or be in possession of any species of fish. Documentation of fish will be captured digitally, and the fish will be immediately released.

FISH SUBMISSION MEDIA REQUIREMENTS

- **Measurement Photo**

The measurement photo must be taken from the “straight down perspective” with no angle. Avoid taking the measurement photo in extremely bright and direct sunlight which can wash out the photo and cause a poor-quality photo. Avoid shadows if possible. The measurement photo must show the entire fish and be clear and in focus. It is solely the participants’ responsibility to provide a clear measurement photo so the Tournament Official can accurately confirm the submission.

 - The measurement photo must show the fish’s mouth closed for Speckled Sea Trout and Snook. NOTE: If the mouth is not closed, a 1 (one) inch penalty will be assessed.
 - The Measurement Photo must clearly show the mouth/nose TOUCHING the “bump end” of the measuring board. NOTE: If the measurement photo does not clearly show the mouth/nose touching, the submission will be rejected and will not count.
 - The measurement photo MUST CLEARLY SHOW the tail of the fish, (pinched or not) on the measuring board so an accurate length measurement can be taken. NOTE: If fish’s tail touches or crosses a

graduation line, the team is allowed to round up to the next closest $\frac{1}{4}$ (quarter) inch.

- **Trophy Photo**

The Trophy Photo can be a “selfie”, or a standard photo taken of the angler holding their fish. “Selfie” type photos should include at the minimum a portion of the anglers head, portion of the fish and the Berkley bait used.

NOTES:

- For this Berkley bait event, your Trophy photo must include the bait used to catch fish.
- *The Trophy Photo may be used for promotional purposes during and after the event.*

- **Release Video**

The release video must show the fish being released back into the water.

NOTE: The release video will not be used to confirm the submission but may be used for promotional purposes during and after the event.

FISH SUBMISSION PROCESS

The required fish submission media requirements will be completed within the app for each fish submission. The fish submission process is simple, quick and intuitive. For more instruction on the Fish Submission Process, please watch the eTournament Quick Guide Tutorial, “Fish Submission Process” (<https://etournamentfishing.com/quick-video-guide-series>) or visit the website: www.eTournamentFishing.com. UPLOADING FISH SUBMISSIONS AND MONITORING SUBMISSION STATUS

When the submission is in the “Being Uploaded” status, it is currently being uploaded to the Tournament Director, this typically takes less than a minute. However, in areas with poor cellular service, this process can take longer. Once the status changes to “Pending

Review”, the upload has been completed and the Tournament Director has your fish submission. If you close the app, the process will pause until you re-open it. We recommend leaving the app open until the uploading process has been completed. At the end of the day or after your final fish submission, make sure that ALL your fish submissions are in the “Pending Review” status. If ANY fish submissions are still in the “Being Uploaded” status, it is due to being in an area with poor or no cellular service or the app was closed prior to completing the upload process. Once you return to an area with good cell service, open the app and leave the app open to allow your fish submissions to upload, you may need to tap the reload icon (circular arrow). Once all your fish submissions are in the “Pending Review” status, they have been uploaded to the Tournament Director for review.

FISH SUBMISSION VERIFICATION DEADLINE

To ensure results can be accurately completed in a timely manner, all participants must confirm that all submissions are in the “Pending Review” status no later than 3:30pm on Saturday. If you have any submissions that are in the “Being Uploaded” status, leave your app open when you return to an area with good cellular service. If for any reason, your submission(s) do not move to “Pending Review”, contact the Tournament Director for assistance PRIOR to the 3:30pm deadline on Saturday. If you do not contact the Tournament Director prior to the deadlines, those fish submissions will not count.

APP USE IN AREAS WITH POOR OR NO CELL SERVICE

The eTournament Fishing app will record your catch with or without cellular data or Wi-Fi connection. If you are in an area with poor or no cellular service, the app will automatically go into offline mode and allow you to submit fish. Once you return to an area with good cellular service it will automatically return to online mode. Open your app to the event’s online submitted fish list page, and your fish submissions will automatically upload.

SAFETY

- Safe boating must be observed at all times.
